Appendix A

DSMP Manual

A-1 System Requirement

- Operating System: Windows 95 or 98
- CPU Type & Speed: Pentium Celeron 266MHz
- Memory: 32 MB RAM
- Hard Drive Space: 6MB
- Application Development Software: Visual FoxPro 6.0

A-2 System Installation

- (1) Select folder **d:\Dsmp**.
- (2) Create folder **c:\Dsmp**.
- (3) Copy files from **d:\Dsmp** to **c:\Dsmp**.

A-3 Starting the System

- (1) Open the program Visual FoxPro.
- (2) Open the project **c:\Dsmp\Dsmp.pjx**.
- (3) Select the form **main menu** and click **run**.

A-4 Exploring the System

DSMP software composes of three major components as following:

- *Database*: for storing input and output data of the system.
- *Menus and Forms*: for interacting and directing the system.
- *Programs*: consist of knowledge base and model base for data analysis.

A-5 System Database

DSMP database composes of 39 table files for storing input, output, and in-process data. Figure A.1 presents the database in DSMP software.

Figure A.1 DSMP Database.

A-6 System menus and forms

DSMP menu composes of main menu and 8 sub-menus for recording, browsing, and directing the system. Main menu of DSMP is presented in Figure A.2. From the main menu, users can select sub-menus or command buttons browsing into sub-menus or executing programs. Sub-menus in main menu are presented as follows:

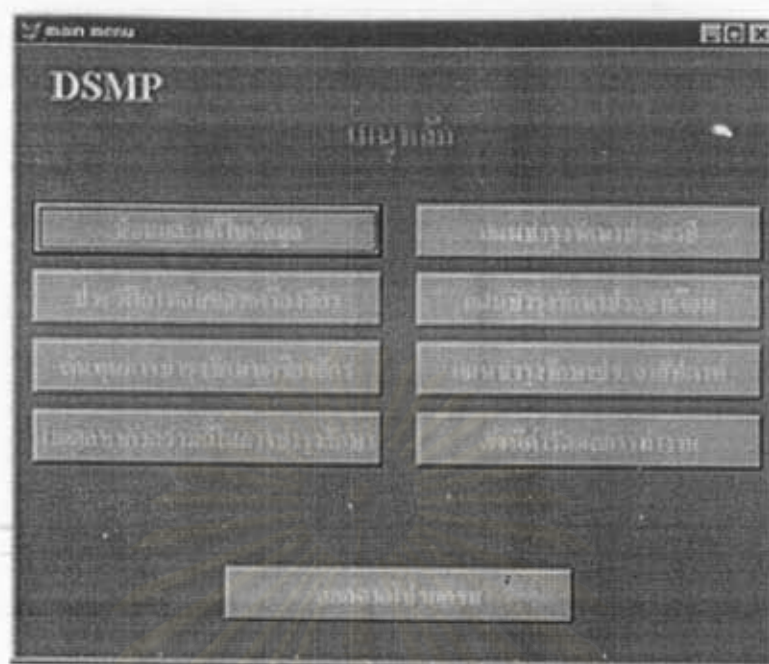

Figure A.2 Main Menu.

Input menu: is on the top right of the main menu. Input menu consists of different specific forms for adding, deleting, or editing data in DSMP database.

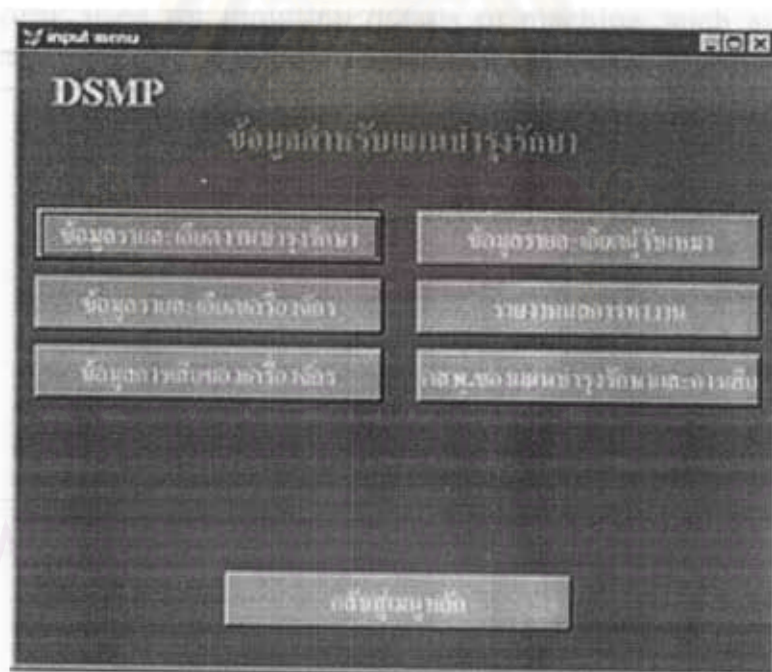

Figure A.3 Input Menu.

According to Figure A.3, input menu consists of 6 specific forms for recording data as following:

- *Preventive task form*: used for inputting details of preventive task, job no, frequency, and work hours into job list table file.

The screenshot shows a software window titled "job list" with the following fields and values:

Field (Thai)	Value	Field (Thai)	Value
หมายเลขงาน	P-P01-01	จำนวนงาน	1
หมายเลขเครื่องจักร	P01	จำนวนชั่วโมง	0.50
ความถี่ในการบำรุงรักษา	30 วัน	หมายเลขผู้รักษา	

Below the input fields is a text area labeled "รายละเอียดงาน" (Task Details) containing the text: "ทำความสะอาดห้องเครื่อง (ของเครื่อง) เป็นประจำในหน่วยประกอบสาย". At the bottom are navigation buttons: Home, Back, Forward, End, Print, Save, Add, Edit, Delete, and Refresh.

Figure A.4 Preventive Task Form.

- *Machine form*: used for inputting details of machine, such as machine no, machine name, and specific details into machine list table file.

The screenshot shows a software window titled "mac list" with the following fields and values:

Field (Thai)	Value
หมายเลขเครื่องจักร	P01
ชื่อเครื่องจักร	Marubishi 3F
ชนิดเครื่องจักร	4C Press

Below the input fields is a text area labeled "รายละเอียดเครื่องจักร" (Machine Details) which is currently empty. At the bottom are navigation buttons: Home, Back, Forward, End, Print, Save, Add, Edit, Delete, and Refresh.

Figure A.5 Machine Form.

- *Failure form*: used for inputting details of machine failure, such as failure no, failure effect, repair time, and failure details into failure list table file.

Figure A.6 Failure Form.

- *Subcontractor form*: used for inputting details of subcontractor, such as subcontractor no, address, and service rate into subcontractor list table file.

Figure A.7 Subcontractor Form.

- *Report form*: used for inputting summary of daily maintenance work and failure. Report form composes of 2 sub-forms and command for updating weekly plan.

Figure A.8 Report Form.

- *Work report sub-form*: used for inputting maintenance work report, such as date, job no, work hours, and workforces into weekly plan summary table file.

Figure A.9 Maintenance Work Report Sub-form.

- *Failure report sub-form*: used for inputting machine failure report, such as date, failure no., downtime, and repair time into machine failure history table

file.

Figure A.10 Machine Failure Report Sub-form.

After data of daily maintenance work report and machine failure is recorded. Weekly maintenance plan can be updated by using update command in report form.

- *Relationship form*: used for recording relationships between preventive task and machine failure into relationship table file.

Figure A.11 Relationship Form.

Machine failure history command: is on the second right of the main menu. Machine failure history command is used for browsing number of failures occurred to a specific machine. After selecting the command, DSMP software will ask users to identify machine no that users demand to see. Figure A.11 presents the request form for identifying machine no.

Figure A.12 Machine No Request Form.

After selecting machine no, list of failure history of specific machine is presented as in figure A.12.

Date	Mc_no	Failure_no	Downtime	Repairtime	Subcontract_no
10/14/99	P01	P01-006	8.00	5.00	0001
12/23/97	P01	P01-035	4.00	1.00	0001
