

## CHAPTER VIII

## RECOMMENDATION FOR FUTURE WORK

The following research is recommended

1. Extension to longer piles, the shape effect on stiff clay, and the end bearing on sand of various shapes. ~~should be studied~~
2. The group action of various shapes of piles.
3. The disturbance of soil properties due to driving of various shapes of piles.
4. The driving stress of various shape of piles.
5. The types of splicers used in various shapes.
