Thesis Supervisor Assistant Professor Dr. Virulh Sa-yakanit

Thesis Title The Approximate Electronic Band Structure of Transition Metals

Name Miss Sa-nguansiri Roongkeadsakoon

Department Physics

Academic Year 1975

ABSTRACT

The KKR and KKR-Z theories for electronic band structure calculations are reviewed. Heine's justification of the model Hamiltonian methods for transition metals devised by Hodges et al. and by Mueller independently is described. Hubbard's hybrid theory without an arbitrary parameter is adopted as the starting point for the study of s-d hybridization and pseudopotential effects in transition metals. An attempt is made to obtain the total band structure energy per atom for transition metals.

In comparison with Deegan's work based on another version of Hubbard's theory with a parameter, the present result is more general and physically more interesting as no arbitrary parameters was needed in the theory.

บทคัดย่อ

ในการวิจัยได้ศึกษาหาข้อมูลการคำนวณโครงการสร้างແນບພลังงานอีเล็กตรอนแบบ
เคลือบฟ้า และ เคลือบฟ้า-เช็ค นักวิจัยยังได้ศึกษาทฤษฎีของไฮเน่ ในการให้เหตุผล
สนับสนุนวิธีขยายมิติ โน่น即以擴充尺寸 ในการคำนวณແນບພลังงานของໂລມະຫວານໃຫຍ່ ซึ่งกิต
ชีนโดยขออภิสัยและขอ恕 และโดยมุตต์เลอร์ การศึกษาเอส-ดีไชบาร์โคเซ็นและศักย์จำแลง
อาศัยผลจากทฤษฎีที่ไม่มีพารามิเตอร์ของอัตราการ งานวิจัยนี้ได้พยายามคำนวณພลังงานท่อ
อะตอมที่ได้จากการสร้างແນບພลังงานในໂລມະຫວານໃຫຍ່

ทฤษฎีที่ได้ทำการศึกษานี้มีความน่าสนใจ และใช้งานได้กว้างขวางกว่าผลงาน
ของคู่แgn เนื่องจากไม่มีความจำเป็นต้องอาศัยพารามิเตอร์ในทฤษฎี

ACKNOWLEDGEMENTS

I wish to express my sincere appreciation to Dr. Virulh Sa-yakanit who supervises this thesis for his valuable guidance throughout the work.

I am greatly indebted to Dr. Kopr Kritayakirana for his kind assistance in improving my English manuscript and for many useful discussions, and to Dr. Sa-on Patumtevapibal for her helpful conversations.

Also, I would like to acknowledge the kind support of the University Development Commission, National Education Council, in providing a graduate scholarship.

TABLE OF CONTENTS
