BIBLIOGRAPHY

Vuthichai Napasab was born in Bangkok, Thailand, on March 20, 1959. He received the BSc. (Hon.) degree in Biomedical Electronics (thesis on "Electronics Spectrophotometer") from Salford University, Salford, England, in 1981, and the MSc. degree in Medical Electronics and Physics (thesis on "The Method of Pain Relief Using Transcutaneous Electrical Nerve Stimulator") from St. Barthoromew's Hospital Medical College, University of London, London, England, in 1982.

In 1983 he joined the Department of Electrical Engineering at Chulalongkorn University, Bangkok, Thailand, and was appointed a lecturer. From October 1987 through March 1988, on leave of absence from Chulalongkorn University, he joined Okoshi-Kikuchi Laboratory at the University of Tokyo, Tokyo, Japan, where he was engaged in research on coherent optical fiber communications.
