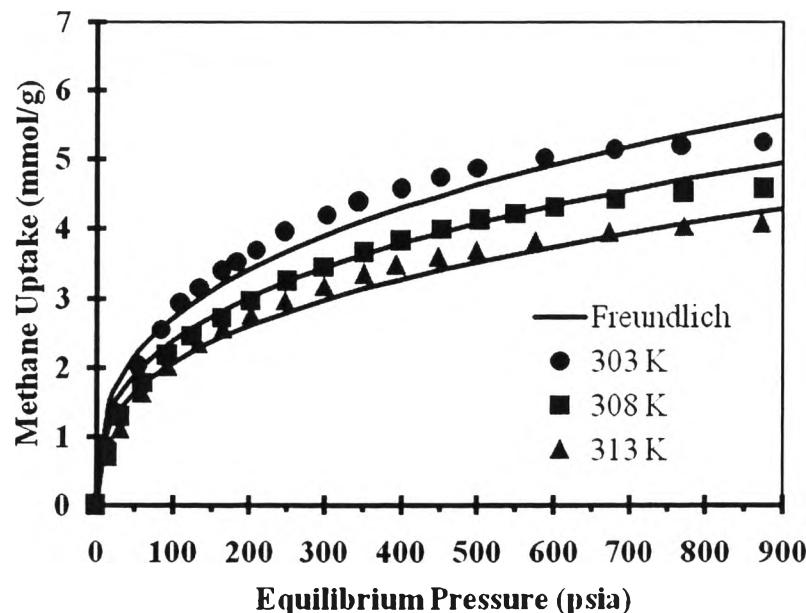

Figure B7 Methane adsorption on Coconut Shell Powder Activated Carbon. Symbols represent the experimental data while lines represent Freundlich isotherm model data.

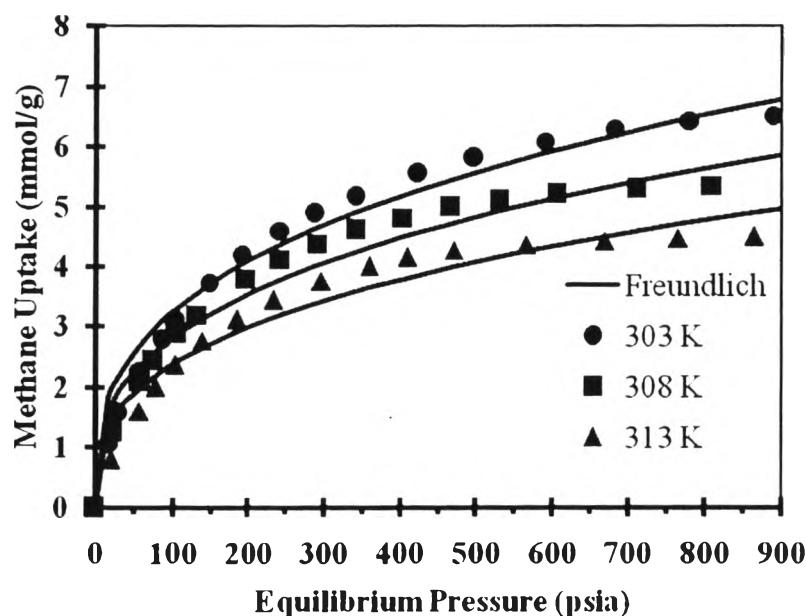

Figure B8 Methane adsorption on Coconut Shell Granular Activated Carbon. Symbols represent the experimental data while lines represent Freundlich isotherm model data.

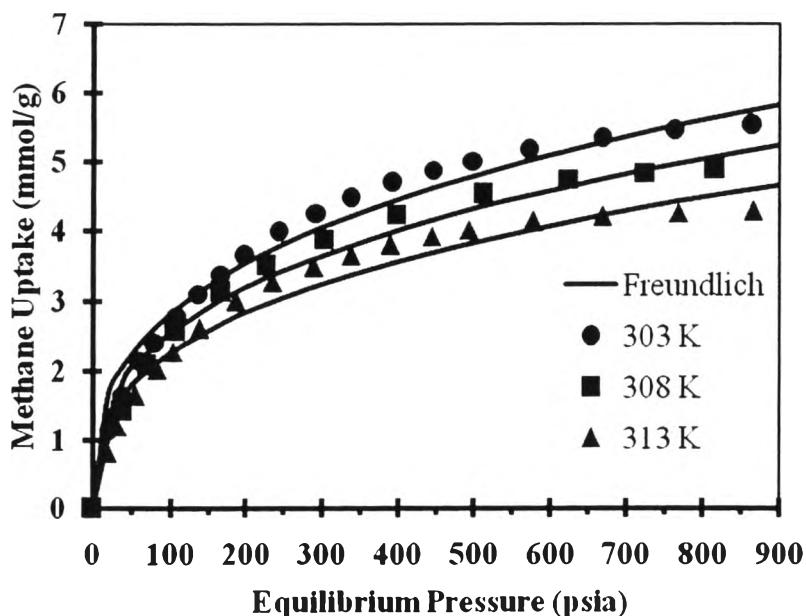

Figure B9 Methane adsorption on Calgon (20-40 meshes). Symbols represent the experimental data while lines represent Freundlich isotherm model data.

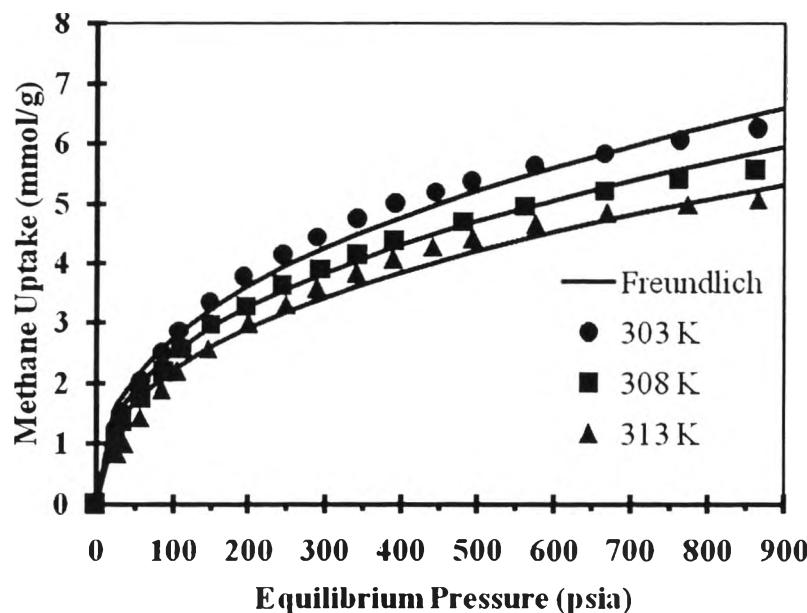

Figure B10 Methane adsorption on Eucalyptus Powder Activated Carbon. Symbols represent the experimental data while lines represent Freundlich isotherm model data.

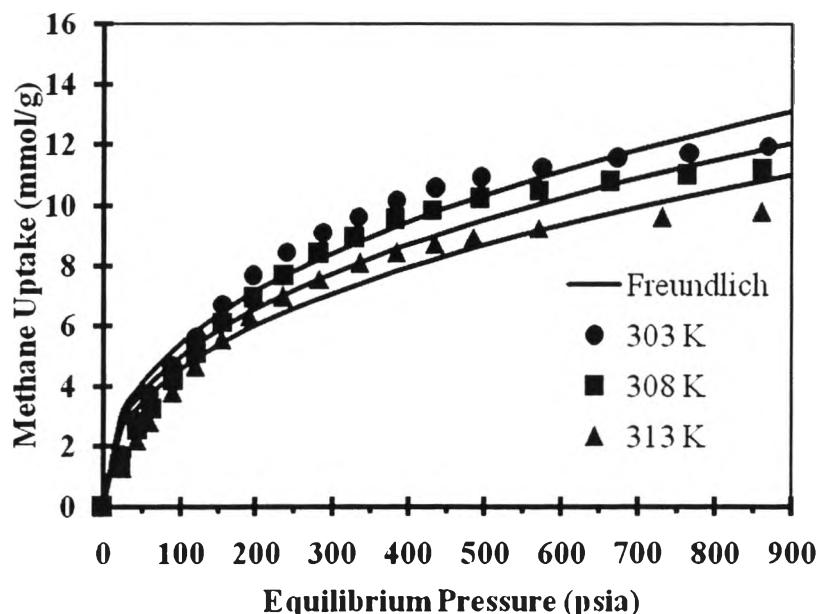

Figure B11 Methane adsorption on Basolite C300. Symbols represent the experimental data while lines represent Freundlich isotherm model data.

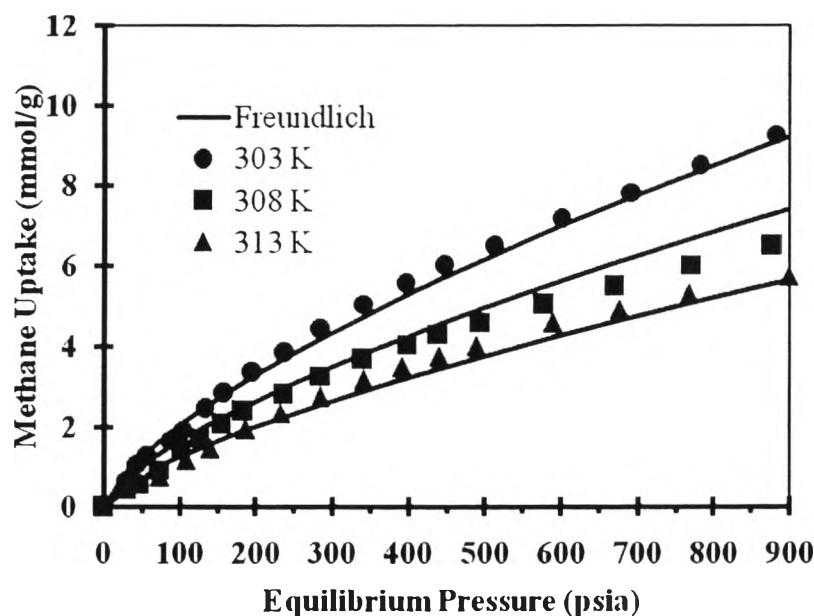

Figure B12 Methane adsorption on Baselite Z1200. Symbols represent the experimental data while lines represent Freundlich isotherm model data.

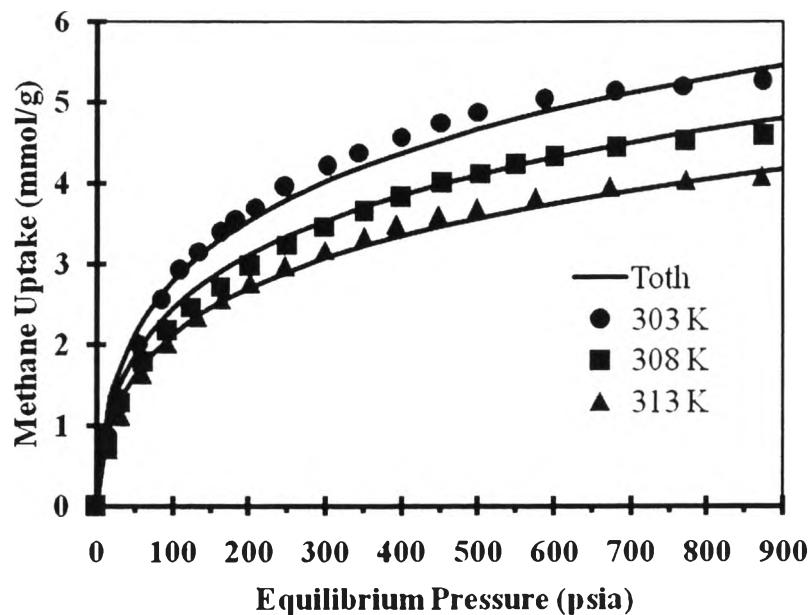

Figure B13 Methane adsorption on Coconut Shell Powder Activated Carbon. Symbols represent the experimental data while lines represent Toth isotherm model data.

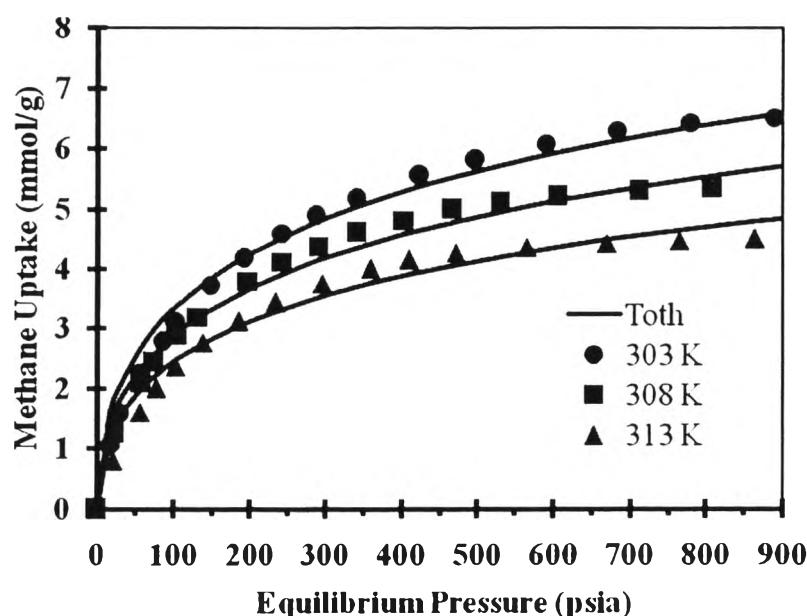

Figure B14 Methane adsorption on Coconut Shell Granular Activated Carbon. Symbols represent the experimental data while lines represent Toth isotherm model data.

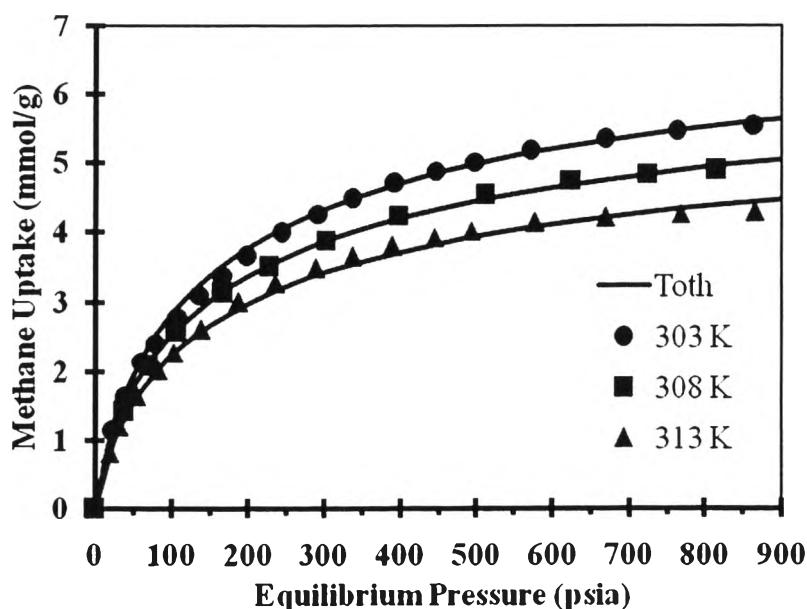

Figure B15 Methane adsorption on Calgon (20-40 meshes). Symbols represent the experimental data while lines represent Toth isotherm model data.

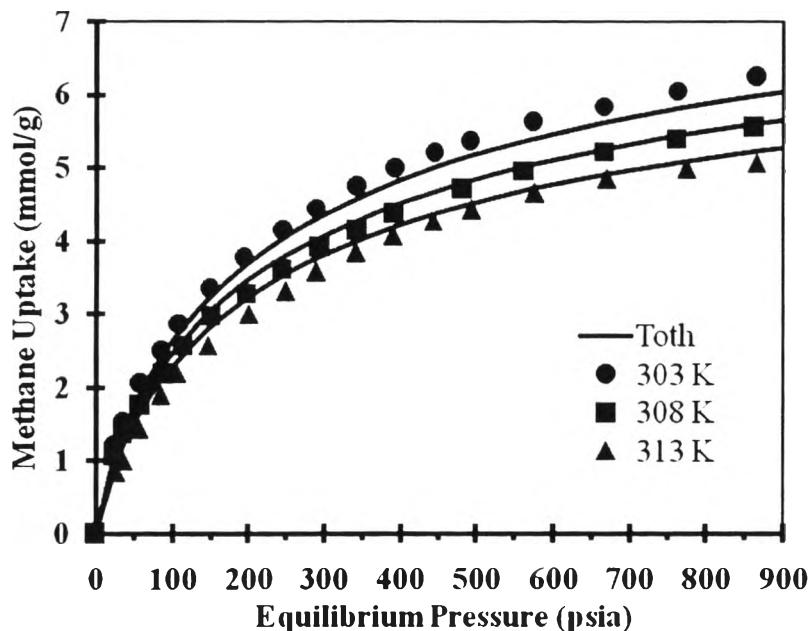

Figure B16 Methane adsorption on Eucalyptus Powder Activated Carbon. Symbols represent the experimental data while lines represent Toth isotherm model data.

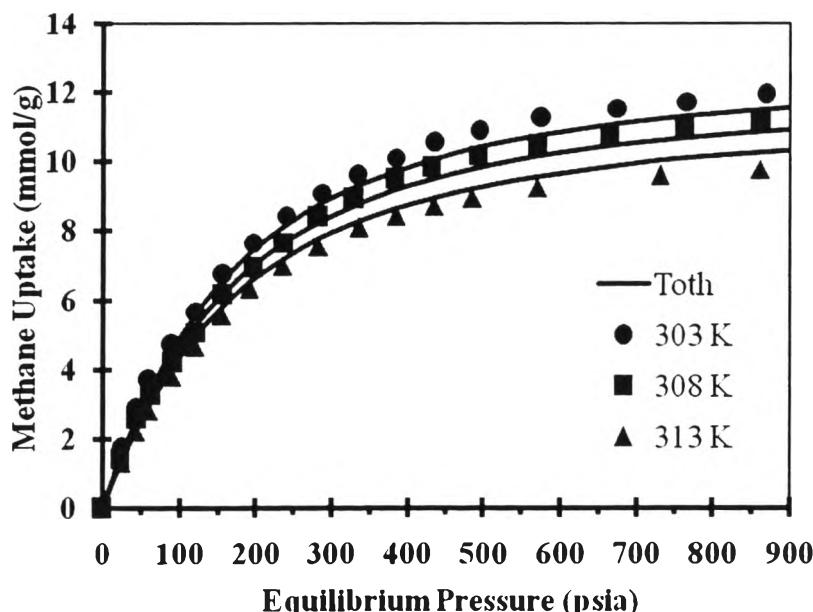

Figure B17 Methane adsorption on Basolite C300. Symbols represent the experimental data while lines represent Toth isotherm model data.

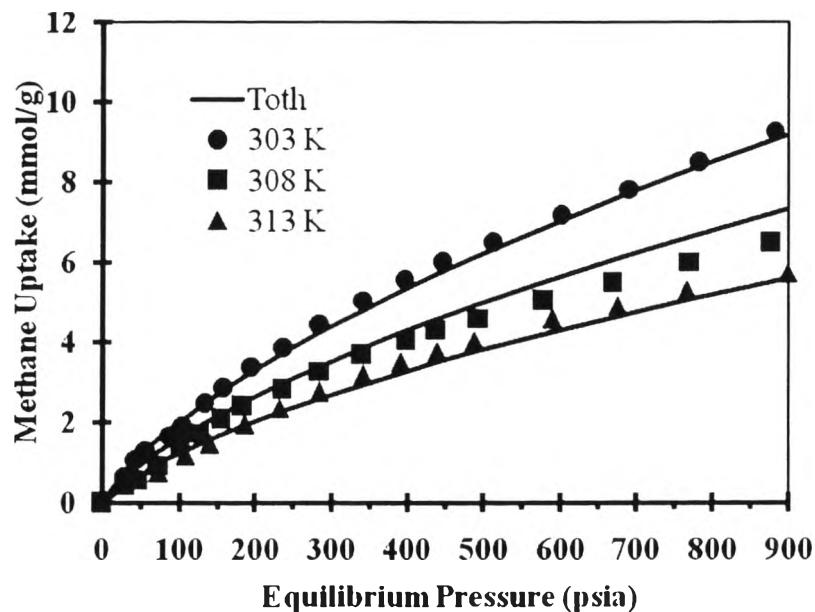

Figure B18 Methane adsorption on Basolite Z1200. Symbols represent the experimental data while lines represent Toth isotherm model data.

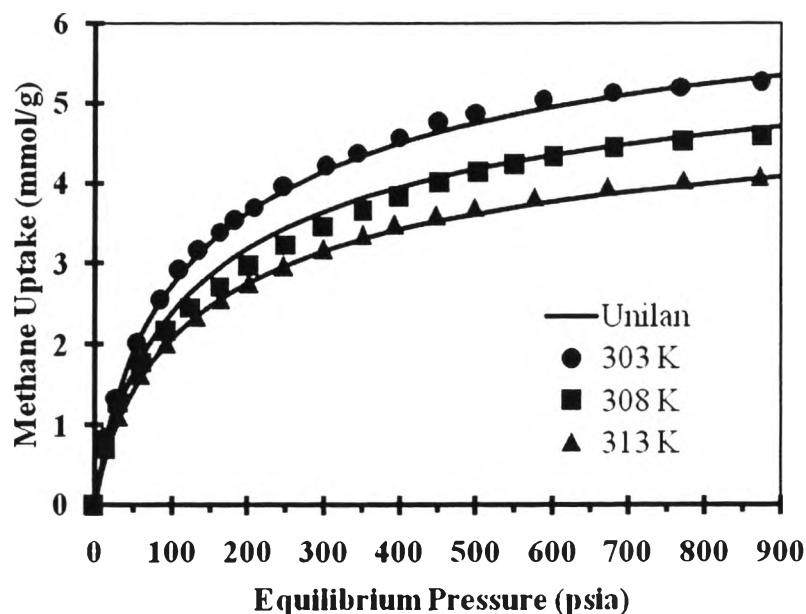

Figure B19 Methane adsorption on Coconut Shell Powder Activated Carbon. Symbols represent the experimental data while lines represent Unilan isotherm model data.

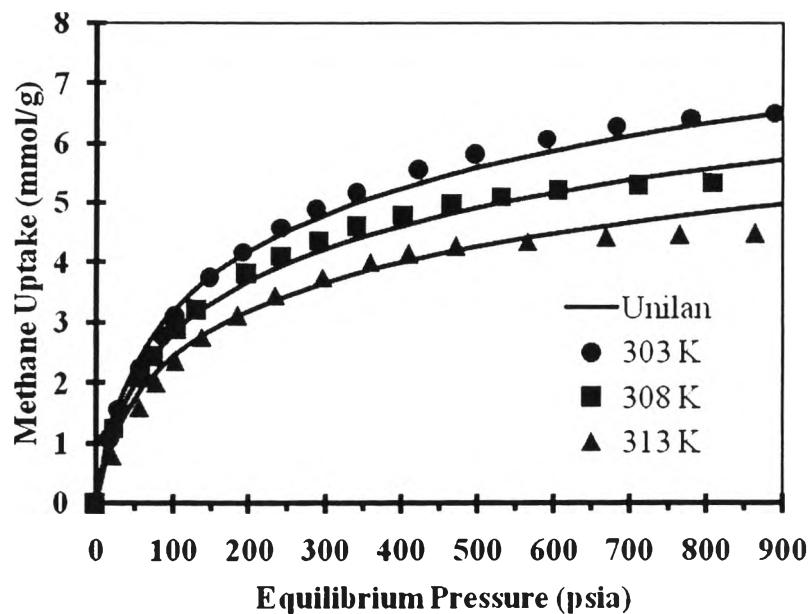

Figure B20 Methane adsorption on Coconut Shell Granular Activated Carbon. Symbols represent the experimental data while lines represent Unilan isotherm model data.

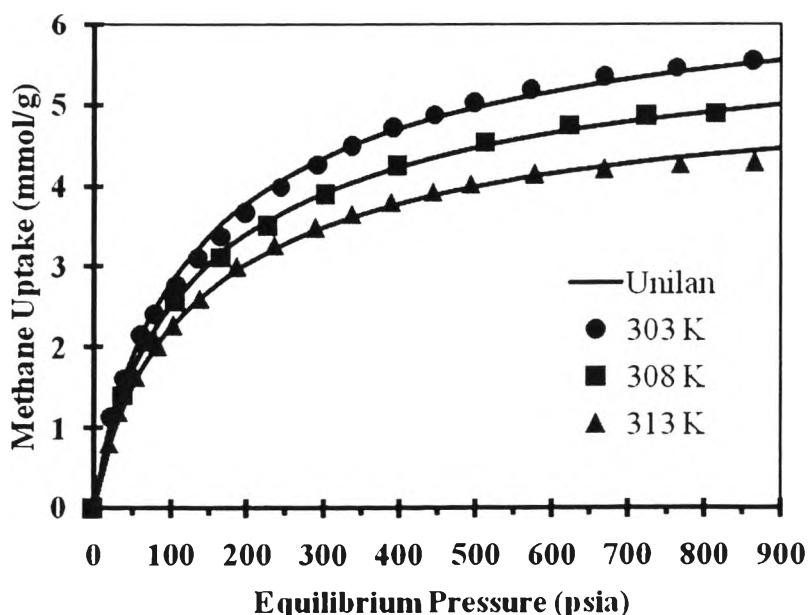

Figure B21 Methane adsorption on Calgon (20-40 meshes). Symbols represent the experimental data while lines represent Unilan isotherm model data.

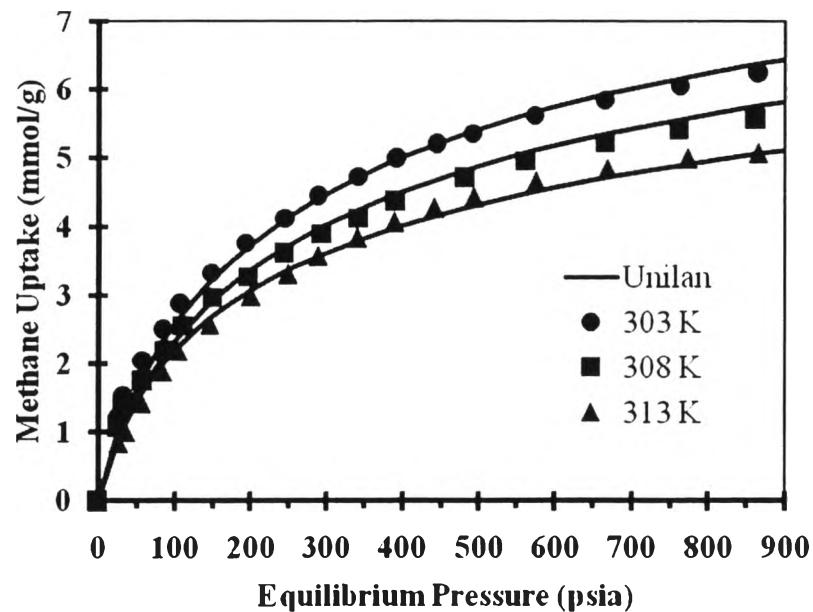

Figure B22 Methane adsorption on Eucalyptus Powder Activated Carbon. Symbols represent the experimental data while lines represent Unilan isotherm model data.

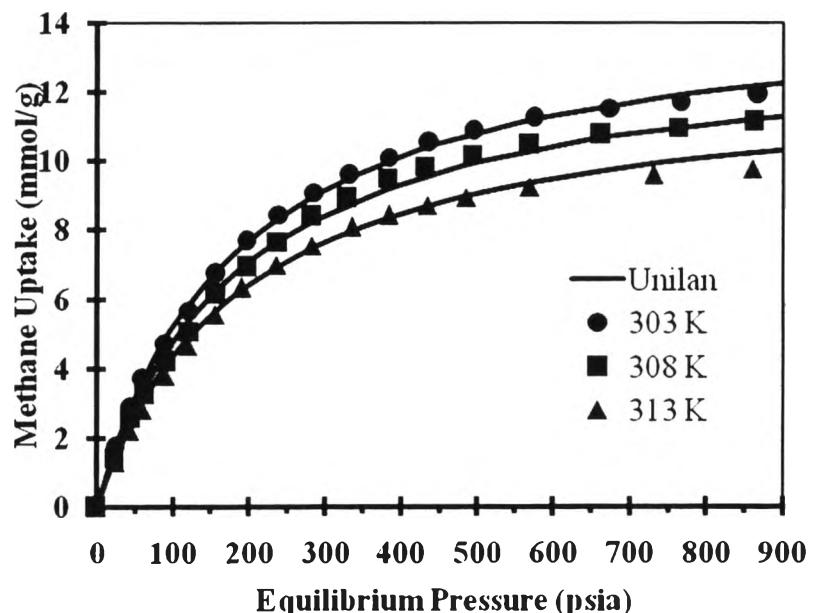

Figure B23 Methane adsorption on Basolite C300. Symbols represent the experimental data while lines represent Unilan isotherm model data.

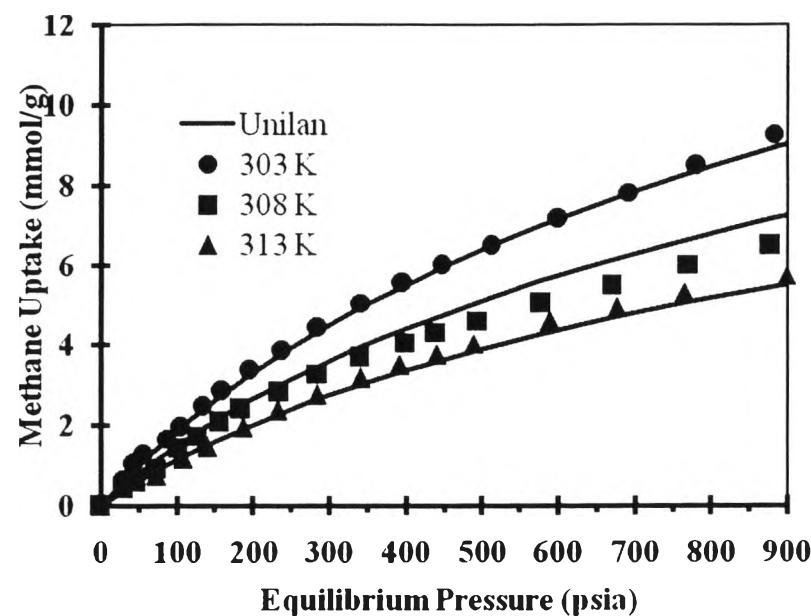

Figure B24 Methane adsorption on Basolite Z1200. Symbols represent the experimental data while lines represent Unilan isotherm model data.

CURRICULUM VITAE

Name: Ms. Narumol Kumpoomee

Date of Birth: March 7, 1988

Nationality: Thai

University Education:

2006–2010 Bachelor Degree of Petrochemical Engineering, Faculty of Engineering and Industrial technology, Silpakorn University, Thailand

Work Experience:

2009 Position: Engineer Internship Student
Company: PTT Aromatics and Refining Public Company Limited, Rayong, Thailand

Presentations:

1. Kumpoomee, N.; Kitayanan, B.; Rangsuvigit, P.; and Kulprathipanja, S. (2012, April 24) Comparative Study of Methane Adsorption on Metal Organic Frameworks and Activated Carbons. Poster presented at The 3rd Research Symposium on Petroleum, Petrochemicals, and Advanced Materials and the 18th PPC Symposium on Petroleum, Petrochemicals, and Polymers, Bangkok Thailand.
