ALKALOIDS FROM *UNCARIA SALACCENSIS* BAKH.F. NOM PROVIS

MR. SUMPHAN WONGSERIPIPATANA

A Thesis Submitted in Partial Fulfillment of the Requirements

for the Degree of Master of Science in Pharmacy

Department of Pharmaceutical Botany

Graduate School

Chulalongkorn University

1979

Thesis Title      Alkaloids from *Uncaria salaccensis* Bakh.f. nom provis  
By                    Mr. Sumphan Wongseripipatana  
Department        Pharmaceutical Botany  
Thesis Advisors   Associate Professor Payom Tantivatana, Ph.D.  
                         Assistant Professor Dhavadee Ponglux, Ph.D.

---

Accepted by the Graduate School, Chulalongkorn University in  
partial fulfillment of the requirements for the Master's degree.

*S. Bunnag*  
..... Dean of Graduate School  
(Associate Professor Supradit Bunnag, Ph.D.)

Thesis Committee :

*Vichara Jirawongse*  
..... Chairman  
(Associate Professor Vichara Jirawongse, Ph.D.)

*Payom Tantivatana*  
..... Member  
(Associate Professor Payom Tantivatana, Ph.D.)

*Bamrung Tantisewie*  
..... Member  
(Assistant Professor Bamrung Tantisewie, B.Sc. in Pharm.)

*Dhavadee Ponglux*  
..... Member  
(Assistant Professor Dhavadee Ponglux, Ph.D.)

บทคัดย่อ

โดยการใช้สครัมภ์รงคเลข สามารถแยกอัลกาลอยด์ pentacyclic heteroyohimbines 3-isoajmalicine, 19-epi-3-isoajmalicine และ pentacyclic oxindoles mitraphylline, uncarine B จากใบของต้นเครือสีเหลือง พร้อมทั้งได้ศึกษาคุณสมบัติทางเคมีและฟิสิกส์ของอัลกาลอยด์ทั้งสี่ชนิด

Thesis Title        Alkaloids from *Uncaria salaccensis* Bakh.f. nom provis

Academic Year     1978

## ABSTRACT

By means of column chromatography, pentacyclic heteroyohimbines 3-isoajmalicine and 19-epi-3-isoajmalicine, and pentacyclic oxindoles mitraphylline and uncarine B were isolated from the leaves of *Uncaria salaccensis* Bakh.f. nom provis. The physical and chemical properties of these alkaloids were studied.

## ACKNOWLEDGEMENTS

The author wishes first to express his deep indebtedness and grateful thanks to his advisor, Associate Professor Dr. Payom Tantivatana, Head of the Department of Pharmaceutical Botany, Chulalongkorn University, Faculty of Pharmaceutical Sciences, for her helpful guidances, keen interest and suggestions throughout the course of this work.

The author also wishes to express his sincere gratitude to his advisor, Assistant Professor Dr. Dhavadee Ponglux of the Department of Pharmacognosy, Chulalongkorn University, Faculty of Pharmaceutical Sciences for her ideas, keen interest, kindness, encouragement and understanding during the course of practical work and presentation of the thesis.

The author is very thankful to Dr. J. D. Phillipson of the School of Pharmacy, University of London for his kind help in determining the nuclear magnetic resonance and mass spectra and also for his helpful discussions.

The author would like to express his appreciation to Associate Professor Dr. Vichara Jirawongse and Assistant Professor Bamrung Tantisewie, the former and the present Head of the Department of Pharmacognosy, Chulalongkorn University, Faculty of Pharmaceutical Sciences, for their very useful suggestions and discussions.

The author would also like to thank Miss Ampai Yongboonkird, Head of Botany Section, Technical Division, Department of Agriculture, Ministry of Agriculture and Cooperatives, for her kindness in identification of the plant materials.

The author is thankful also to Assistant Professor Kalaya Pharadai of the Department of Pharmacognosy, Chulalongkorn University, Faculty of Pharmaceutical Sciences, for her help.

Finally, the author's grateful thanks are due to Chulalongkorn University Graduate School for granting him partial financial support (of three thousand and eight hundred Baht) to conduct this research.
