## ABSTRACT

##961015 : PETROCHEMICAL TECHNOLOGY PROGRAM

KEY WORDS : Ore Flotation Mechanism/Quartz/Aggregation

Panomkorn Kwakhong : Mechanism of Ore Flotation. Thesis Advisors :  
Prof. Jeffery H. Harwell and Dr. Sumaeth Chavadej, 76 pp.

ISBN 974-638-492-9

The objective of this work was to verify partially a proposed mechanism of ore flotation. The hypothesis is that in region II of the adsorption isotherm, the flotation system yields maximum separation efficiency consequent with attaining a maximum size of aggregate formation. Hydrophobic patches on the quartz are exposed when bubbles collide with the aggregate, partially rearranges the particles. In this study, the ground quartz used had an average particle size of 28.3  $\mu\text{m}$  and a specific surface area of 4.21  $\text{m}^2/\text{g}$ . The cationic surfactant used was DTAB (dodecyltrimethylammonium bromide) which was added to a slurry containing  $50 \pm 0.005$  g quartz/l. DTAB concentration was prepared in the range 0.1 to 100,000  $\mu\text{mol/l}$ . The pH of quartz/DTAB solutions was kept at  $6.2 \pm 0.05$ . All experiments were carried out at room temperature. For flotation, the air flow rate was varied at 5.7, 6.5 and 8.4 ml/s. It was found that flotation efficiency increased with an increase in air flow rate only up to a point. It was observed that the maximum flotation efficiency and the maximum size of quartz aggregate formation clearly coincided in region II of the adsorption isotherm, which agrees very well with the proposed hypothesis. No attempt was made in this study to determine if rearrangement of aggregate particles occur when bubble and aggregate collide.

## บทคัดย่อ

พนมกร ขาวทอง : การศึกษากลไกของการลอยแร่ (Mechanism of Ore Flotation)  
อ. ที่ปรึกษา : ศ. เจฟเฟอรี เอช ฮาร์เวล (Prof. Jeffery H. Harwell) และ ดร. สุเมธ ชวเดช  
76 หน้า ISBN 974-638-492-9

วัตถุประสงค์ของการศึกษานี้ เพื่อพิสูจน์สมมติฐานกลไกการลอยแร่บางส่วน โดยสมมติฐานที่เสนอคือ ในขอบเขตที่ 2 ของกระบวนการดูดซับสารลดแรงตึงผิวบนผิวของอนุภาคแร่ ระบบการลอยจะให้ประสิทธิภาพการแยกอนุภาคแร่สูงสุด ซึ่งเป็นผลเนื่องมาจากการรวมตัวกันของอนุภาคแร่ที่มีขนาดใหญ่ที่สุด ในการศึกษาอนุภาคแร่ที่ใช้เป็นแร่ควอทซ์บดมีขนาดโดยเฉลี่ย 28.29 ไมโครเมตร และมีพื้นที่ผิวจำเพาะเฉลี่ย 4.207 ตารางเมตร/กรัมควอทซ์ สารลดแรงตึงผิวที่ใช้เป็นสารลดแรงตึงผิวชนิดประจุบวกคือ โคเดคซิลไตรเมทิลแอมโมเนียมโบรไมด์ หรือ ดีแทบ (DTAB) สารลดแรงตึงผิวถูกเติมเข้าไปในระบบที่มีปริมาณควอทซ์  $50 \pm 0.005$  กรัม/ลิตร ให้ความเข้มข้นของสารละลายในช่วงระหว่าง 0.1 และ 100,000 ไมโครโมล/ลิตร ความเป็นกรด-ด่าง (pH) ของสารละลายถูกควบคุมคงที่ที่  $6.2 \pm 0.05$  การทดลองทั้งหมดดำเนินการที่อุณหภูมิห้อง ในการทดลองการลอยนี้ ปริมาณอากาศจะถูกควบคุมที่ 5.7, 6.5 และ 8.4 มิลลิลิตร/วินาที จากผลการทดลองพบว่าประสิทธิภาพของการลอยเพิ่มขึ้นด้วยการเพิ่มขึ้นของปริมาณอากาศที่เข้าสู่ระบบ และที่น่าสนใจอย่างยิ่งคือ ปริมาณการกำจัดควอทซ์สูงสุดและขนาดที่ใหญ่ที่สุดของอนุภาคแร่เกิดขึ้นชัดเจนที่ขอบเขตที่ 2 ของกระบวนการดูดซับซึ่งเป็นไปตามสมมติฐานที่เสนอไว้

## ACKNOWLEDGEMENTS

No significant work can be a success without the participation of the number of individuals and organizations.

Out of a sense of gratefulness, the author would like to express his deepest gratitude to Prof. Jeffery H. Harwell and Dr. Sumaeth Chavadej for their kindness, helpful guidance, creative discussions and constant encouragement throughout his graduate work.

Unforgettable thanks are forwarded to all professors who taught him and helped to establish the knowledge used in this work through their courses. The author is also indebted greatly to the teachers and all of the staff of the Petroleum and Petrochemical College who contributed in various degrees to the success of his thesis. The author sincerely thanks his unforgettable friends for giving him so lively and enjoyable an experience during these two years of study.

The author would like to extend special thanks to the Surathip Group Company Limited for a scholarship during his graduate studies.

The author would like to thank to the National Center for Genetic Engineering, especially Dr. Kriangkrai Learttadsanee and Mr. Amnuay Jintasirikul, for use of the LSM 410.

Finally, the author would like to express his whole-hearted gratitude to his parents for their endless love and encouragement, and their measureless support.
