

CHAPTER VI

Bibliography

WHO. (1996). Guide line for preventing HIV, HBV and other infectious in the health care setting. New Delhi India.

This book mentioned about the preventive measure against HIV, HBV and other infections. Sources of infections were from health facilities. The health facility transmitted HIV and other infections to health workers and patients if they care less with that infections. To prevent it infections, the book advised health workers have to wash their hand before and after doing something use of protective barriers, disinfecting and sterilisation equipment.

That book showed some measures how to avoid from infections by use managing waste in the health care setting, rational injection practices, management of contaminated environment, cleaning of soiled or contaminated clothing, and some diseases like tuberculosis, surgical wound infections, ...etc.

WHO. (1997). AIDS No Time Complacency. SEARO, No. 26, New Delhi, India.

This book provided basic information related to the AIDS epidemic in Southeast Asia.

It gave AIDS awareness in the region but it also stimulated people to take action to prevent the spread of HIV infection and to develop compassion and care for those living with HIV / AIDS.

Each chapter of this book was summarised in the small box. It was easy for the reader to catch and remember all the time. Many boxes had picture which help the reader understand it clearly. All words were used simple.

Seine, J. (1996). *An Annual Overview of Acquired Immune Deficiency Syndrome*. Upper Saddle River, New Jersey: Prentice Hall.

This text offered answers to questions many people have about the AIDS virus and how their immune systems are affected by it. Covered herein are the activity of the immune system with respect to HIV disease, where the virus might have come from, how it is transmitted, who is most likely to become infected.

Many chapters deal with the fear of HIV infection, the social reaction of the uninfected toward the HIV-infected, and acts of discrimination and the laws in place to protect HIV/AIDS persons. Each chapter contains chapter concepts, a summary, review questions, boxed information, highlight important information about HIV infection, and references.

Huber, J. (1996). *HIV/AIDS Community Information Services: Experiences in Serving Both At-Risk and Disinfected Populations*. Binghamton: The Howarth Press.

Huber's book provided a well-organised introduction to the provision of information services that will be useful to those affected by HIV disease, health care practitioners, librarians, and other information professionals. This book is an excellent introductory resource to guide the reader to the acquisition of HIV/ AIDS information.

Freudenberg, N. (1989). *Preventing AIDS: A Guide to Effective Education for the Prevention of HIV Infection*. Washington DC: American Public Health Association.

This book provided the guide includes information on both the social and political forces that influence AIDS educators, and practical advice on how to assess a population's needs, develop education materials, build coalitions, and evaluate program effectiveness.

It has two sections: the first section described the process for planning AIDS education and the second section described the special needs and experiences of AIDS educators working with specific population. The section one was very important. It guided every one can play a role in AIDS prevention, no matter what their personal risk status.
