ฐานกร อิงอนรัตน์ : การประเมินของระบบการจัดการคุณภาพด้วยตนเองสำหรับบริษัทโทรคมนาคมไทย (SELF-ASSESSMENT OF QUALITY MANAGEMENT SYSTEMS FOR A THAI TELECOMMUNICATION COMPANY) อ. ที่ปรึกษา : รศ. ดำรงค์ ทวีแสงสกุลไทย, 239 หน้า. ISBN 974-637-023-5.

ขบวนคุณภาพกำลังมีบทบาทที่สำคัญ ท่ามกลางสถานการณ์ที่มีการเปลี่ยนแปลงรวดเร็วและการแข่งขันที่รุนแรง วิธีการที่จะให้ได้มาซึ่งการปรับปรุงคุณภาพอย่างต่อเนื่อง เป็นสิ่งจำเป็นอย่างปัจจุบันทันคุณ เมื่อที่รู้กันอยู่แล้วว่าบริษัทหนึ่งจะอยู่รอดได้นั้นขึ้นอยู่กับระบบการจัดการคุณภาพของบริษัทในด้านนี้ !!แต่เมื่อจากการวัดระบบการจัดการคุณภาพออกแบบมาเป็นตัวเลขนั้นทำได้ยาก การวิจัยนี้จึงเป็นความพยายามที่จะพัฒนาแบบจำลอง เพื่อประเมินระดับความสำเร็จของระบบดังกล่าว สำหรับบริษัทโทรคมนาคมไทยบริษัทหนึ่ง แบบจำลองดังกล่าว จะมีอยู่ 2 แบบ แบบแรกอ้างอิงมาจากมาตรฐาน ISO9000 ส่วนแบบที่สองอ้างอิงมาจาก the Baldridge Award แบบจำลองแบบแรกจะประกอบไปด้วยเกณฑ์คุณภาพ 8 เกณฑ์ และเกณฑ์คุณภาพย่อยอีก 26 เกณฑ์ ในขณะที่ แบบที่สองมีเกณฑ์คุณภาพทั้งหมด 7 เกณฑ์ และเกณฑ์คุณภาพย่อยอีก 27 เกณฑ์

การสำรวจเพื่อการวิจัยชุดนี้ถูกจัดทำขึ้น โดยใช้แบบสอบถาม 2 ชุด โดยแต่ละชุดจะบีดแนวทางจากแบบจำลองทั้งสองแบบข้างต้น แบบสอบถามชุดแรกจะถูกใช้เพื่อรวบรวมค่าความสำคัญของเกณฑ์คุณภาพและเกณฑ์คุณภาพย่อยแต่ละเกณฑ์ ซึ่งจะตอบโดยผู้เชี่ยวชาญหลากหลายคน ในขณะที่แบบสอบถามชุดที่สองจะถูกใช้เพื่อการลงคะแนนสำหรับแต่ละเกณฑ์คุณภาพย่อย โดยจะเป็นการประเมินตัวเองของบริษัทโทรคมนาคมไทยที่ถูกเลือกมา เป็นตัวอย่าง ต่อไปค่าแนนทั้งหมดจะถูกรวบโดยทำนิ่งถึงความสำคัญของแต่ละเกณฑ์ย่อยที่มีต่อเกณฑ์หลัก และค่าความสำคัญของแต่ละเกณฑ์หลักที่มีต่อความสำเร็จของระบบจัดการคุณภาพสำหรับอุตสาหกรรมโทรคมนาคมไทยคือด้วย โดยจะมีเทคนิคต่างๆ ถูกนำมาสนับสนุนเพื่อใช้ในการคำนวณดังกล่าว

ผลลัพธ์สุดท้ายของงานวิจัยนี้จะบ่งบอกถึงระดับความสำเร็จของระบบจัดการคุณภาพในบริษัทด้วยช่วง รวมไปถึงจุดแข็งและจุดด้อยซึ่งจะถูกได้จากคะแนนที่ปราฏกูของเกณฑ์ต่างๆ ข้อมูลเหล่านี้จะเป็นประโยชน์มาก ต่อผู้บริหารที่จะนำไปใช้ตัดสินใจเพื่อการดำเนินการอย่างโดยย่างหนึ่งต่อไป

THANAGORN ENGAMORN RATTANA : SELF-ASSESSMENT OF QUALITY MANAGEMENT

SYSTEMS FOR A THAI TELECOMMUNICATION COMPANY. THESIS ADVISOR : ASSOC. PROF.

DAMRONG THAWESAENGSKULTHAL 239 pp. ISBN 974-637-023-5.

As quality plays an important role within this changing and highly competitive environment, steps for continuous improvement of quality are urgently needed. It is known that a company's life depends on its quality management system. But such system is difficult to be measured. This study is an effort to develop models for assessing the level of success of quality management system in a Thai telecommunication company. Two assessment models exist with references to two international quality standards: ISO 9000 and the Baldridge Award. The assessment model of ISO 9000 classifies a company's quality management system into 8 quality criteria and 26 subcriteria. Conversely, the assessment model of the Baldridge Award categorises it into 7 quality criteria and 27 subcriteria.

A survey was conducted through two sets of questionnaire, both of which were developed based on two models above. The first set of questionnaire was to collect the importance (weight) of all quality criteria and subcriteria relative to the success of quality management system in Thai telecommunication industry and the corresponding criteria, respectively. It was answered by the experts. The second one was to collect the scores in all the quality subcriteria which were self-assessed by the selected Thai telecommunication company. Such weights and scores were synthesised together to yield an achievement level of successful quality management system for the selected company. The method for this calculation was proposed.

The company's strengths and weaknesses in all the quality subcriteria or criteria have also been included. Certainly, this provides useful information for managers to take corrective actions.

## ACKNOWLEDGEMENT

The author wishes to express his deepest gratitude and sincerest appreciation to his advisor Assoc. Prof. Damrong Thawesaengskulthai for his continuous guidance, supervision and constant encouragement throughout the course of this study. Without his support this study would not have been possible. Grateful acknowledgment is also extended to Assoc. Prof. Dr. Tatchai Sumitra and Prof. Dr. Sirichan Thongprasert for the valuable comments and suggestions as members of the Examination Committee.

The author also wishes to thank Mr. Supin Ungrangsee, Corporate Development Manager & Assistant to the President , ABC Electronic Ltd., for his kind assistance and suggestions during the data collection.

Gratitude is expressed to Ms. Unchana Punjard for their assistance in printing the thesis. Also, the author wishes to thank Ms. Pannipa Jangwithaya for her language checking.

Finally, the author wishes to express his profound gratitude to his parents for their love, encouragement and sacrifice during the entire period of study at the Regional Center for Manufacturing Systems Engineering.
