There were six of them standing round a chair in which they had tied another. Johnny stood there with his hand in his coat packet until, noticing him, they stopped questioning the boy who was tied up.

"Go on," he said. "Don't mind me. I just happened by when I saw you go in the church, then, hearing you were forcing my firend Bob to write a confession by threatening to throw him off the tower, I decided to come up and see."

"Help me !" cried Bob. "Get me out of here! They are going to throw me off."

"Why should I help you? You were just writing a confession, weren't you? Go ahead. Only don't get my name into it, that's all.

If you stole money from this kids, give it back. It has nothing to do with me."

Some of the boys had begun to move towards him.

"Now don't let's get rough, "Johnny said. Then he took his right hand out of his pocket, and there was an open razor in it.
"Somebody might hurt himself on my razor. Hand over that notebook, and move fast".

One of the boys quickly got the notebook, and Johnny tore out of it the page on which Bob had begun to write the confession. "So you did write my name, didn't you?" he said after looking at the piece of paper. He tore it up and threw the pieces on the floor.

"Thanks for everything, everybody," he said moving towards the door. "You've had a good time, I guess. But I shouldn't go un with it if I were you. I'm going to lock the door at the bottom of the stairs е

A rainbow is one of the most beautiful sights in nature, and man has long wondered what makes it happen.

Sunlight, or ordinary white light, is really a mixture of all colors. You've probably seen what happens when light has struck the edge of a mirror, or a soap bubble. The white light is broken up into different colors: red, orange, yellow, green, blue and violet.

An object that has broken up light in this way is called "a prism"

The colors that emerge from a band of stripes, each color grading into

the one next to it. This band is called "a spectrum".

A rainbow is simply a great curved specturm, which produced by the breaking up of light which has passed through raindrops. The raindrops act as prisms. A rainbow is seen only when rain is falling and the sun is shining at the same time. You have to be in the middle, the sun behind you, the rain in front of you, or you can't see the rainbow which is formed.

This is my first day in the grand new school. As I walk up Warden Road I am happy to see all the people I am going to meet. The new girls have been told to arrive an hour later than the rest. Therefore, when fifty new girls are led into a large room, the school is quiet because everyone is already in class. An official begins to read aloud a number of regulation and then we are sent away to the various classrooms.

"Where is the tenth grade class?" I ask.

"You must not speak without putting up your hand and you should say 'please' at the end of your question, dear. You will find the number of the class on the door, dear."

I walk alone through the glass door of each room but I cannot find the tenth grade classroom anywhere. When I see a little white haired old woman who is wearing a cap on her head, and who is dressed in black.

"Hey! I am going to the tenth grade class. Do you happen to know where it is? I've only just come."

She said, "That way, down the stairs, the first door you come to at the bottom. I am Miss Buss!"

Miss Buss! I recognize the old woman's name immediately.

She is the headmistress and is known for the way she demands obedience,
but she is also known as a person who loves anyone who is not afraid of
her, looks her in the eye and speaks out.
