## APPENDIX A

### INTRAOBSERVER AND INTEROBSERVER RELIABILITY

The intraobserver and interobserver reliability was conducted before starting the research. Two independent skilled pathologists examined the hematoxylin-eosin staining and bcl-2 staining of 30 patients 2 times. In determining intraobserver reliability, the timing of second evaluation of the slides was at least 2 weeks from the first evaluation. For interobserver reliability the results from the first time evaluation of each pathologist were compared.

The intraobserver and interobserver reliability were reported in Table 1 and Table 2. The kappa value (K) of nearly all factors evaluated were more than 0.7 except for LVSI and bcl-2. Since the kappa value of bcl-2 was quite low, two pathologists had discussed and clarified the definition of bcl-2 scoring before starting to evaluate all the slides

**Table 1** Intraobserver reliability in 30 patients.

Evaluating factors	Intraobserver reliability			
	Pathologist 1		Pathologist 2	
	Observed agreement (%)	K (95%CI)	Observed agreement (%)	K (95%CI)
Tumor histology (squamous/non-squamous)	100	1.00	100	1.00
Tumor grade (1 / 2-3)	93.3	0.84 (0.63-1.00)	93.3	0.86 (0.67-1.00)
Depth of invasion (≤1/2 / >1/2)	86.7	0.73 (0.50-0.97)	93.3	0.86 (0.68-1.00)
LVSI (no/yes)	86.7	0.73 (0.49-0.97)	80.0	0.61 (0.33-0.88)
Bcl-2 expression (negative/positive)	80.0	0.47(0.15-0.79)	76.7	0.53 (0.25-0.82)

**Table 2** Interobserver reliability in 30 patients.

Evaluating factors	Interobserver reliability	
	Observed agreement (%)	K (95%CI)
Tumor histology (squamous/non-squamous)	100	1.00
Tumor grade (1 / 2-3)	90.0	0.78 (0.56-1.00)
Depth of invasion (≤1/2 / >1/2)	86.7	0.73 (0.49-0.97)
Lymph-vascular space invasion (no/yes)	83.3	0.67 (0.40-0.93)
Bcl-2 expression (negative/positive)	66.7	0.40 (0.16-0.64)

In evaluation all 95 patients in this study (Table 3), the tumor histology was reported differently in only 1 case. For other factors, the reports were differently in 12-15 cases. In these disagreement cases two pathologists had reviewed slides together. The results use in the analysis came from the consensus of both pathologists.

**Table 3** Interobserver reliability in all 95 patients.

Evaluating factors	Interobserver reliability	
	Observed agreement (%)	K (95%CI)
Tumor histology (squamous/non-squamous)	98.9	0.98 (0.93- 1.00)
Tumor grade (1 / 2-3)	84.2	0.64(0.47 - 0.80)
Depth of invasion (≤1/2 / >1/2)	85.3	0.68(0.52 - 0.83)
Lymph-vascular space invasion (no/yes)	87.4	0.75(0.61 - 0.88)
Bcl-2 expression (negative/positive)	85.3	0.71(0.57 - 0.85)

16. Date of last follow up at the hospital	16. ____/____/____
17. Status at last contact by other methods 3. Dead from cervical cancer 4. Alive without disease 5. Alive with disease 6. Dead from other causes .....	17. ____
18. Date of last contact by other methods (mail, phone, etc) (please indicate 1. No 2. Mail 3.Phone 4. Others .....) .....	18. ____/____/____
19. Status at last contact by any methods (code as 15)	19. ____
20. Date of last contact by any methods	20. ____/____/____
21. Indicate methods of last contact 1. Hospital contact 2. Mail 3.Phone 4. Others .....	21. ____
<b>Criteria for exclusion</b>	
Patients receive any adjuvant pre op or post op treatment 1. No 2. Yes (excluded from study)	

## APPENDIX B

### CASE RECORD FORM III : PATHOLOGY AND IMMUNOSTAINING

1. Serial number	1. ____
1a. Code of pathologists 1. Dr. Sumalee 2. Dr. Surapun	1a. ____
1b. Code for pathological and immunostaining slides	1b. ____
1c. Total number of slides for pathological review ____	1c. ____
<b>Pathology of primary tumor</b>	
22. Tumor histology 1. Squamous 2. Non squamous	22. ____
2.1 Adenocarcinoma 2.2 Adenosquamous cell carcinoma	
2.3 Others .....	
23. Tumor grade 1. Grade 1 2. Grade 2 3. Grade 3	23. ____
24. Lymph-vascular space invasion (LVSI)	24. ____
1. Absence 2. Presence state number.....	
25. Depth of invasion from basement membrane 1. $\leq 1/2$ 2. $> 1/2$	25. ____
<b>Interpretation of bcl-2 expression</b>	
26. Result of immunostaining	26. ____
1. Negative 2. 1+ 3. 2+ 4. 3+	
<b>Criteria for exclusion</b>	
1. Pathology of dissected lymph nodes 1. Neg 2. Pos (exclude) Number of nodes removed ____	
2. Parametrial invasion 1. No 2. Yes (exclude)	
3. Vaginal margin involvement 1. No 2. Yes (exclude)
