

Chapter VII

RECOMMENDATION FOR FUTURE WORK

For the future design of the hospital sewage treatment plant by the oxidation ditch system in Thailand, the following study are recommended:-

1. Comparative study of waste water treatment by oxidation ditch system and another system for hospital sewage treatment in Thailand
2. Cost studies of hospital waste treatment by the oxidation ditch system and another system.
3. The evaluation of hospital sewage treatment efficiency in Thailand.
4. The study of foam treatment in the hospital waste treatment by water spraying and water consumption for treated foam.
