บทคัดย่อ

2,4-ไดไนโตรเฟนนีลไฮดราซีน (*2,4-dinitrophenylhydrazine*) ทำปฏิกิริยา กับหมู่คาร์บอนีลของสารประกอบกีโนนได้ต่างกันสีส้มของอนุพันธ์ 2,4-ไดไนโตรเฟนนีลไฮดราซีน (*2,4-dinitrophenylhydrazone derivative*) ซึ่งไม่ละลายน้ำ จึงนำปฏิกิริยานี้มาดัดแปลงให้เหมาะสมสำหรับใช้วิเคราะห์ที่มีเบนดาโซล (*mebendazole*) ในเชิงปริมาณโดยวิธี visible spectrometry และทำการพิสูจน์เอกลักษณ์ของอนุพันธ์ 2,4-ไดไนโตรเฟนนีลไฮดราซีนที่ได้โดยวิธี thin layer chromatography, ultraviolet-visible spectrometry, infrared spectrometry, H^1 -nuclear magnetic resonance spectrometry และ mass spectrometry นอกจากนี้ยังได้ศึกษาถึงสภาวะต่าง ๆ ที่มีผลต่อปฏิกิริยา จากการวิเคราะห์ที่มีเบนดาโซลในยาเม็ดจากบริษัทต่าง ๆ โดยวิธีนี้ให้ผลเป็นที่น่าเชื่อถือได้ เมื่อเปรียบเทียบกับวิธีมาตรฐานของ USP XXI

ABSTRACT

The reaction of 2,4-dinitrophenylhydrazine (2,4-DNPH) and ketone yields an orange precipitate of 2,4-dinitrophenylhydrazone (2,4-DNPH'zone) derivative which is insoluble in water, and it was developed in order to assay mebendazole by visible-spectrometric method. The 2,4-DNPH'zone derivative obtained was identified by thin layer chromatography, ultraviolet-visible spectrometry, infrared spectrometry, H^1 -nuclear magnetic resonance spectrometry and mass spectrometry. The various conditions affecting the reaction were examined. It was shown that mebendazole in tablets could be assayed with a good result by 2,4-DNPH method comparable to the official method that prescribed in USP XXI.

ACKNOWLEDGEMENTS

The author is grateful to Associate Professor Dr. Sunibhond Pum mangura and Instructor Naunsri Nivattisaivong, Department of Pharmaceutical Chemistry, Faculty of Pharmaceutical Sciences, Chulalongkorn University, for their guidance, patience and understanding throughout this research work.

The author thanks to the staff members of the Scientific and Technological Research Equipment Center, Chulalongkorn University.

The helpful cooperation of the staff members of the Department of Pharmaceutical Chemistry, Faculty of Pharmaceutical Sciences, Chulalongkorn University is appreciated.

Finally, the author thanks to Chulalongkorn University Graduate School for providing partial financial support.
