## **APPENDIX**

## APPENDIX

The release of essential oil from essential oil-encapsulated nanospheres in fabric softener

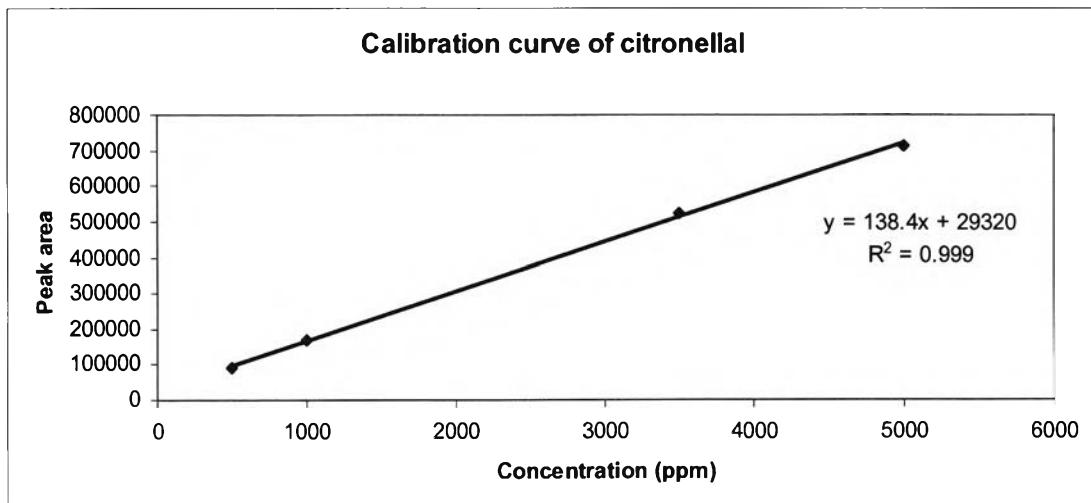

Figure A1 Calibration curve of Citronellal

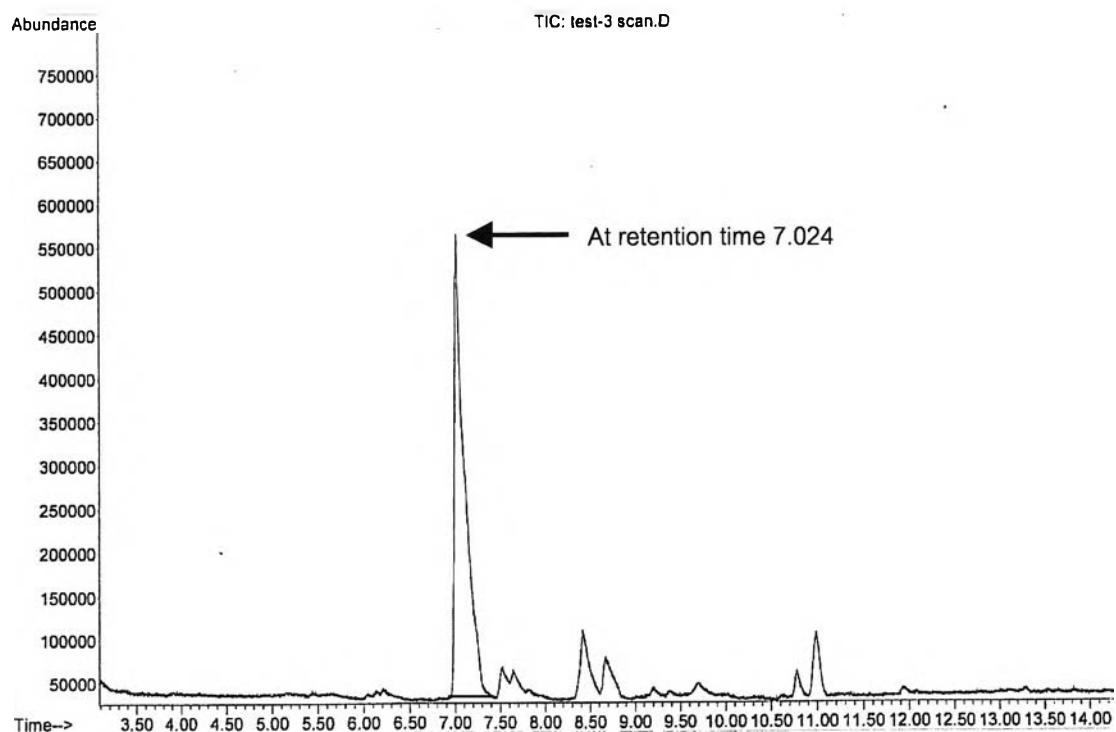

Figure A2 Retention time and area of citronellal was loaded in cut cotton.

From the equation of calibration curve;

$$Y = 138.4X + 29320, R^2 = 0.999 \quad \text{-----(1)}$$

The amount of citronellal was loaded in cut cotton calculated by equation (1);

$$181111 = 138.4X + 29320$$

$$X = 1096.8$$

$$\text{ppm} \longrightarrow \text{mg/ 1000 ml} \therefore 1096.8 \text{ ppm} = 1096.8 \text{ mg/ 1000 ml}$$

Product volumetric 1 ml gave content of citronellal 1.0968 mg

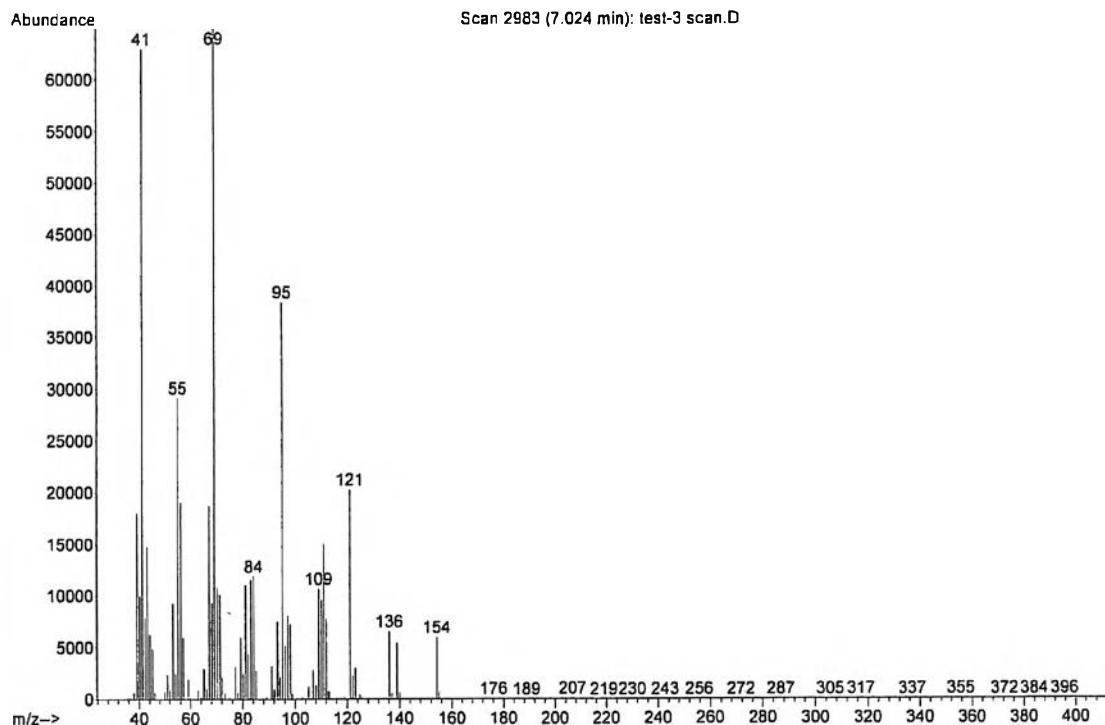

Figure A3: Mass spectrum of citronellal

## VITA

Ms. Orapan Tatipanithep was born on July 27, 1983 in Bangkok, Thailand. She obtained a Bachelor's Degree of Science (Chemistry) from Srinakarinwirot University in 2005. After that, Miss Tatipanithep has worked as a Lab analyst with IDS Manufacturing Company Limited. At the same time she also started her master study in the Program of Petrochemistry and Polymer Science at Chulalongkorn University. During her study Miss Orapan contributed academically to the second National Conference on Science and Technology (NCST 2009) via a research presentation entitled "Compatibility between essential oil nanoencapsules and various surfactants"

Her address is 132/2 Moo 8, Tumbol Banphea, Amphur Banphea, Samut Sakhon, 74120, Telephone number: 034-480-777, 08-3828-0620.
