A-NET CO., LTD.

PRODUCT/SERVICE OFFERED SERVICE

A-NET is missioned to be proactive Internet Service Provider (ISP). By “pro-active” we mean that A-NET is designed to serve not as a mere connecting point to the Internet, but as a value added gateway to numerous facilities., products and services that are available through the Internet. A-NET’s shareholders include the Communications Authority of Thailand (CAT), ANEW Corporation Ltd., and a number of leading educational institutions. This strong partnership provides solid foundation for A-NET to carry out our mission. A-NET’s expansion plan to establish a “nation-wide” network for our members is scheduled to be completed by 1997, with major sites established by the end of 1996.

A-NET offers a variety of solutions to suit various needs. A-NET’s services are classified into two major groups:

Individual/Dial-In Service: As A-NET’s individual member, you can enjoy all the basic and value-added facilities that are available through the Internet. This class of services is catered for home-users up to small businesses/offices. A-Net intends to make dial-in access to the Internet via A-NET to be fast, reliable and friendly.

There are 5 services within this group: D1 to D5 (E-Mail 15/ 0.6 MB) is for those who need only E-Mail and Newsgroup facilities. D2 (Graphic 10/2MB), D3 (Graphic 20/2MB) and D4(40/2MB) all offer full Internet facilities at different levels of log-in time. With D2 to D4 services, users can enjoy all Internet facilities, such as electronic mail, UseNet, WWW, and so on. D5 (Corporate Internet Domain) is designed especially for small organizations that need efficient and economical means of communication via corporate wide Internet e-mail.

Corporate/Leased-Line Service: A-NET intends to be a business partner to our corporate members, offering not only Internet access but also Internet solutions catered for each organization’s unique need. We take each individual organization, either public institution or private enterprise, as a unique entity. We will work with each organization to arrive at an Internet solution designed, implemented and managed according to each particular organization’s needs. The result would be a package of technologies and services that enable an organization to exploit its access and use of the Internet to the fullest potential. A-NET will assist corporate users with before- and after-sale services that are designed to turn your Internet access into a new strategic tool, constantly empowering you with innovative and better business capabilities and opportunities.

A-NET offers 8 levels of corporate/leased-line services, ranging from L1 at 9.6K to L8 512K.

Recommended Systems and Equipment for Connection to A-NET Services

Individual/Dial-In Service:

- A personal computer system (PC or Mac) with adequate capacity for Internet and Interactive use,
- A modem,
- One telephone line while log-in

Corporate/Leased-Line Service

- Internet server system,
- Communication equipment (router),
- Leased-line service from CAT, TOT or commercial providers.

INTERNET THAILAND CO., LTD.

PRODUCT/SERVICE OFFERED

SERVICE

Internet Thailand Company Limited was the first authorized Internet Service Provider in Thailand and is a joint venture between National Science and Technology Development Agency(NSTDA), The Communications Authority of Thailand(CAT), and The Telephone Organization of Thailand (TOT).

As a commercial service and offshoot of the National Electronics and Computer Technology Center (NECTEC), its goal is to provide Thailand with a large-bandwidth internetworking infrastructure and high-quality Internet access service. Internet Thailand has offered both the individual user service and the corporate connection service since March 1995 and was the first Internet Service Provider to have a 512kbps, 2Mbps, 4Mbps and 8Mbps fiber optic link between Thailand and the USA.

- **Inet-Access**
 - **Individual**
 - **Corporate**
 - **Provincial PoPs**
 - **GSM Mail Note**
 - **Roaming**
 - **Inet-ID**
 - **Web hosting**
 - **Web design**
- **Inet-Access**

Internet Thailand Co., Ltd. is proud to introduce a new pay-as-you-use Internet access service called "Inet-Access". This service was developed in response to the great demand of Internet users for no monthly usage quota and lower Internet access charges. Inet-Access does not have a fixed 20 hours per month quota of on-line time. Instead, access hours are bought with credits, known as e-Money, and unused credit is carried forward up to 180 days. These online credit can also be used to purchase goods and services on the Internet. These merchandises will be gradually made available in the future through our Cybermall e-Commerce website as well as from Internet Thailand's partner websites. The service charge for Internet access has been reduced to a flat rate of 35 Baht per hour (0.59 Baht per minute) inclusive of VAT - that's just 700 Baht for any 20 hours.

Individual user services

These services are made available for individuals only. The subscriber requires only a PC (personal computer) and a modem for dialing-in from any telephone to the Internet Thailand server. We have more than 500 lines, analog and

digital, for our users with speeds up to 56 Kbps. In this way, users may log in to Internet Thailand's computers, which are online to the Internet 24 hours a day, 7 days a week.

Type of Individual User Service

Inet-Access - Graphic Mode

(Use on Windows 3.11 or Windows 95/98 or Macintosh)

Inet-Access is a pre-paid True PPP account with no monthly online time quota. You pay only for the time you use and you may choose your own email account name. The cost is 35 baht per hour and payment is made by buying e-Money tickets from vendors or from Internet Thailand. Account set-up and registration of e-Money are done online.

WorldNet (WN) - Text Mode

(Use on PC DOS or Zterm for Macintosh)

WorldNet is a full-function Internet account with all popular tools such as pine (electronic mail), rtin (news reader), offline reader tools, telnet (remote log-in), gopher (Gopher service), Lynx (Web services), ftp (file transfer), etc. This service enables you to search for information without pictures.

WorldNetPlus (WNP) - Graphic Mode

(Use on Windows 3.11 or Windows 95/98 or Macintosh)

WorldNetPlus is a True PPP account. It is the graphical equivalent of WorldNet. With a user-friendly interface, you can send email with Eudora and use Netscape or Microsoft Internet Explorer to search the World Wide Web for text, graphics or multimedia information-all with the click of a mouse. WorldNetPlus is the most popular choice for serious Internet users.

BizNetPlus (BNP) - Graphic Mode

(Use on Windows 3.11 or Windows 95/98 or Macintosh)

BizNetPlus is similar to WorldNetPlus, but economically packaged to allow twice the resources normally permitted for login hours.

All types of service include diskettes for Internet applications and an Internet User Manual.

If applying at the office, the account will be ready to use in 2 days.

If you have problems with Internet usage, you can email to our staff 24 hours a day or contact our Customer Support by phone or fax from Monday to Friday 8.30 hrs. - 17.30 hrs.

Our Individual User Price

| | WorldNet | WorldNetPlus | BizNetPlus |
|-----------------------------------|-----------------|---------------------|-------------------|
| Login time | 20 hrs/month | 20 hrs/month | 40 hrs/month |
| Disk space | 2.0 MB | 2.0 MB | 2.0 MB |
| Message/month | unlimited | unlimited | unlimited |
| Startup (baht) | 200 | 300 | 300 |
| Monthly fee | 300 | 900 | 1,400 |
| Extra charge for extra login time | 20 | 30 | 30 |
| Advanced payment for 3 months | 1,100 baht | 3,000 baht | 4,500 baht |

Note:

- The subscription period must be 3 months.
- All prices are inclusive of VAT.
- **You will automatically get a 5% monthly fee discount for the access services when you renew after 3 months and then 10% after 24 consecutive months.**
- Unused login time for any month cannot be carried forward to the following month.
- Prices are subject to change without notice.

Corporate

A Corporate Internet Access Service is a service provided for any organization that:

- wants to have its own IP address and domain name,
- have many internal Internet users and run out of office phone lines when they all call out simultaneously,
- wants to publicize the organization's information including its products and services by creating a homepage on the World Wide Web which allows access to people around the world at any time,
- wants to be ready to accept incoming mail at all times, and provide extremely fast interactive mail services to tens or hundreds of internal users in the company.

The organization has to prepare equipment for connecting to the Internet, including a leased line to Internet Thailand's office. This service will allow the organization to provide Internet access to unlimited staff members and manage the internal network more effectively. However, the organization is not permitted to connect to other organizations or serve non-organization employees.

Minimum Requirement

1. Internet Servicing Host with TCP/IP software, Internet service programs, and a free async serial port for communication.
2. Leased circuit with proper line equipment (e.g. modem/ NTU/data adapter, etc.) to interface with Internet Thailand using RS232C/D asynchronous data.
3. For connection at 64Kbps speed or higher: an Internet router to link Ethernet LAN to the wide-area network (leased-circuit) and leased circuit with proper line equipment to interface with Internet Thailand using V.35 HDLC.

The organization needs an expert in LAN management and TCP/IP Protocol to administer the network.

Corporate Subscribe

1. Fill in the application form and sign.

2. Submit the application form, related documents, and subscription fee (startup + monthly fee for 3 months).
- Come by yourself/Let someone else apply for you at Internet Thailand's office
 - By registered mail Internet Thailand needs to keep the original application form and signature for financial evidence.

Corporate Connection Services

1. Inet Service
2. Inet-FR
3. Inet-Lite
4. Inet-Quad
5. Inet-K12
6. Ultralite

Note:

- The minimum subscription period is 3 months.
- The excess use of data volume specified will cause an extra charge of 10 Baht per megabyte per month.

Inet Service

Corporate connection service

A Corporate Internet Access Service is a service provided for any organization that:

- wants to have its own IP address and domain name,
- have many internal Internet users and run out of office phone lines when they all call out simultaneously,
- wants to publicize the organization's information including its products and services by creating a homepage on the World Wide Web which allows access to people around the world at any time,
- wants to be ready to accept incoming mail at all times, and provide extremely fast interactive mail services to tens or hundreds of internal users in the company.

The organization has to prepare equipment for connecting to the Internet, including a leased line to Internet Thailand's office. This service will allow the organization to provide Internet access to unlimited staff members and manage the internal network more effectively. However, the organization is not permitted to connect to other organizations or serve non-organization employees.

Inet-FR

Corporate Connection Service

A service for a group of node customers require high-speed international bandwidth.

Frame Relay is a communication technology developed to satisfy the needs of every organization. The transmission in the digital system through the cable is rapid, accurate and quite flexible. Connectivity is achieved though the frame relay network circuit to suit the needs of the organization. It is called "CIR (Committed Information Rate)" and the double peak bandwidth at some times is known as "MIR (Maximum Information Rate)"

Our Price

| Service Name | Max In-Out Data Volume (Mbyte/month) | Startup fee (Baht) | Monthly fee (Baht) |
|---|---|--------------------|--------------------|
| Inet-FR 64k MIR 128kbps/ CIR 64kbps | 8,400 | 81,800 | 81,800 |
| Inet-FR 128k MIR 256kbps/ CIR 128kbps | 16,600 | 143,100 | 143,100 |
| Inet-FR 256k MIR 512kbps/ CIR 256kbps | 33,200 | 204,500 | 204,500 |
| Inet-FR 512k MIR 1Mbps/ CIR 512kbps | 66,400 | 491,400 | 491,400 |
| Inet-FR 2M MIR 4Mbps/ CIR 2Mbps | 256,400 | 1,718,100 | 1,718,100 |

Note:

- The prices are exclusion VAT 10%
- Inet-FR does not support Multi-homing

Inet-Lite**Corporate Connection Service**

Inet-Lite is a service for a group of node customers whose communication is primarily within Thailand. Hence, the demand for high international bandwidth is not the major concern.

In contrast to normal Inet node customers, the circuit that carries international traffic for Inet-Lite nodes is connected through a bandwidth reduction filter before passing the traffic to the international link. Monthly fee special offer for this service.

Our Price

| Service Name | Max In-Out Data Volume (Mbyte/month) | Startup fee (Baht) | Monthly fee (Baht) |
|----------------|---|--------------------|--------------------|
| Inet-Lite 64k | 8,400 | 81,800 | 53,100 |
| Inet-Lite 128k | 16,600 | 143,100 | 93,000 |
| Inet-Lite 256k | 33,200 | 204,500 | 153,400 |
| Inet-Lite 512k | 66,400 | 491,400 | 372,200 |
| Inet-Lite 2M | 256,400 | 1,718,100 | 1,116,800 |

Note:

- The prices are exclusion VAT 10%
- Inet-Lite does not support Multi-homing

Inet-Quad**Corporate Connection Service**

Inet-Quad is a service for the group of companies, academic Institutions or associations. Who are willing to join together to benefit from the more economical cost of larger bandwidth. Each company has a leased line connection to Internet Thailand Co., Ltd. minimum 64 kbps. Monthly fee is a special offer less than Inet regular.

Our Price

| Service | Amount Customers per Bandwidth 64Kbps. | Max In-Out Data Volume (Mbyte/month) | Startup Fee (Baht) | Monthly fee (Baht) per Bandwidth 64Kbps | Total Monthly fee (Baht) |
|-------------------|---|--|-----------------------|--|--------------------------------|
| Inet-Quad 256K | 4 | 8,400 | 49,100 | 49,100 | 196,400 |
| Inet-Quad 512K | 8 | 8,400 | 46,800 | 46,800 | 374,400 |
| Inet-Quad 1M | 16 | 8,400 | 44,500 | 44,500 | 712,000 |
| Inet-Quad 2M | 32 | 8,400 | 42,700 | 42,700 | 1,366,400 |

Note:

- The prices are exclusion VAT 10%
- Inet-Quad does not support Multi-homing

Inet-K12**Internet for Academic Institutions**

- The prices are exclusive of VAT 10%
- Ultralite does not support Multi-homing

➤ GSM Internet Mail Note

GSM Internet Mail Note is an e-mail notification service. When an e-mail is sent to the user, it will notify on the phone display immediately.

Any Internet Thailand subscribers who uses a Digital GSM mobile phone.

You can choose whether you want to have every e-mail or specific e-mail notified to you by stating specific e-mail Address, subject or date & time you want. When an e-mail is sent to you, the system will notify by envelope symbol blinking or the word "Message" appearing on the phone display. Emails that arrive when your mobile is closed will be kept for one day.

You can have your handset connected to your Notebook and Data Card (PCMCIA) and log into the Internet to read the whole content of e-mail at your convenience.

Note: Subject and part of e-mail message up to 160 characters per notification message.

Cost

1. Startup Fee: 467.29 Baht (VAT not included)
2. Monthly Fee: 186.92 Baht / First 100 messages (VAT not included) and 1.87 Baht per message if exceeds 100 messages (VAT not included)

Subscribe the service

You can subscribe this service at every AIS Service Centers nationwide with following documents:

1. **Private User** - A copy of an identification card of a Digital GSM owner.
2. **Corporate User**

- A copy of an identification card of the authorized director, certifying a true copy by him/her.
- A certificate of the registration of the company, certified and affixed seal a true copy by the authorized signature binding the company.
- Authorized person is allowed to register on behalf of the Digital GSM mobile owner if power of attorney is presented together with a copy of identification card of the Digital GSM owner and the authorized person, certifying a true copy by them.

After applying, you will receive an e-mail which gives further instructions on how to start the service.

➤ **International Roaming**

Internet Thailand has joined Global Access Network-iPass alliance and join the Global Reach Internet Connection-GRIC which consist of Internet Service Providers around the globe that allow you to connect to the Internet from many different local dial-up phone numbers worldwide-using the same Internet account you use at home. This is a cost-effective solution for business travelers and telecommuters who must otherwise make long distance telephone calls to access their Internet accounts at home or at their workplace.

Since October 1, 1998 Internet Thailand has entered into an exclusive agreement with ASAHI Net to provide direct roaming service in Japan with over 100 access points throughout Japan.

The benefits of using the International roaming service are:

- Roaming charges are significantly less than long distance charges.
- Log into a local number all over the world with one account.
- Access all Internet services such as e-mail and WWW.
- Use existing (and familiar) web browser/e-mail.

After applying for the service, you can download the software, with a simple point-and-click interface, that enables you to connect to the Internet with a local phone from more than 1,000 locations around the world. You can choose GRIC, iPass or ASAHI Net access points in the location you are traveling to everytime you want to roam. When you travel, you dial into the local number and log in with your full Internet Thailand e-mail address (yourlogin@inet.co.th) and the new password assigned to be used for roaming only. (You will receive your new password via e-mail on the next day after you applied for the service. For security reasons, please do not change it to be the same as your password for mozart.) In effect, you are still logging into the Internet via Internet Thailand, even though you are dialing through a different provider. You can continue to use your regular web browser, e-mail program, or newsgroup software.

Cost

There is a charge of 300 Baht for the startup fee, which gives you access to GRIC, iPass and ASAHI NET access points. Usage fees are different for:

| Startup Fee get GRIC, I-PASS and ASAHI Net : 300 Baht | | |
|--|--|--|
| GRIC | iPASS | ASAHI Net |
| Per month: 80 Baht (for the roaming month only) | Per month : 80 Baht (for the roaming month only) | Per minute: 1.75 Baht (in Japan Only) |
| Per minute: 1.5 Baht within the United States and Canada 2.8 Baht outside the United States and Canada | Per minute: 1.5 - 9.3 Baht (varies for different countries and cities) to check the most recent rate for iPass access points. | |

For the month that you use that you use the roaming service, you will receive an invoice in the following month.

WEB HOSTING

Web Development

Internet KSC can handle every aspect of designing and building your World Wide Web site. To fully understand the needs of individual business owners, we thoroughly analyze your business, and recommend how you can best utilize what the WWW has to offer-now and in the future.

We can convert your existing marketing materials into web pages, or as an option, we can design and create all the graphics and/or write copy for your pages. Your presence in the Internet is much more than putting attractive web pages in the Internet. We can custom design and implement applications (such as online ordering processing and database applications) tailored to your specifications. Please call 576-0899 ext. 1424-1425 for more information about our service.

| Scope of Work | Design and | | Development Fee | |
|----------------|-----------------|-----------------------------|-----------------------------|--|
| | 1-5 Pages | 6-10 Pages (10% discounted) | 11 Pages up(15% discounted) | |
| Text Only | 1,000 Baht/Page | 900 Baht/Page | 850 Baht/Page | |

| Java Script | 4,000 Baht/Page | 3,600 Baht/Page | 3,400 Baht/Page | |

Remark:

- 1) 1 page (A4) = 3 computer screens
- 2) 10% VAT is not included

Web Hosting

When you have a Website, it's like having a business that is open 24 hours a day, 7 days a week, 365 days a year. That puts you ahead of your competitors who aren't on the Internet.

Here are some other reasons why so many businesses are now on the World Wide Web:

- A Huge, Growing Audience: 30 million Internet users and growing at 10% a month.
- Easy Change and Updating: Your Website can grow and change as your business grows and changes. It's far easier and far less expensive to update a Website than a printed brochure or catalog, and there are virtually no space limitations.
- 24 x 7 Visibility Customers and prospects can access your company and product information 24 hours a day, quickly and easily, and they can send you e-mail feedback any time.

Our service

If you are small to medium-sized business who wants to establish and grow your web presence, then we have a suite of solutions for you. Web hosting Service from Internet KSC will help you establish a distinctive presence on the Internet, and will help you improve communications, collaboration throughout your organization and with your customers, partner and vendors. Questions? Please call 576-0899 ext 1424-25 to speak to a Sales Representative or mail to webhosting@ksc.net.th.

Why host your web with Internet KSC

- High speed circuit both international link and domestic link.
- High performance with Sun Ultra server.
- State-of-the-art switching and routing equipment.
- 7 day a week technical support.
- Daily tape backups
- Uninterruptable power
- Available both Unix and NT

The complete range of basic network systems:** Samart CyberNet is backed by the best efforts of research and development experts in hailand and abroad (USA, Hong Kong), continually refining networks and providing every onceivable back-up necessary to make your trips as smooth and satisfy as possible.
- 4. Up-country service centers:** Samart CyberNet has a growing network of up-country service centers bringing everyone on-line. Which also means that members can still access Samart CyberNet for the usual 3 baht a call instead of the long-distance rate you would pay if you had to go through the Bangkok service center. Plus, expert technicians are waiting to offer advice and sort out your problems inside our up-country service centers.
- 5. Copyright Netscape Navigator:** Samart CyberNet has signed a full copyright agreement with Netscape Communication Corporation, proud owners of the Browser program known as Netscape Navigator. This contract

buys Samart CyberNet members total confidence that whenever they use a Browser function or utility they do so in complete accordance with the law.

Membership Categories
