

## CHAPTER V

### RECOMMENDATIONS

Although the project implementation was successful of the overall program performance could be further improved and to make these conditions be sustainable and toward a better one. The following recommendations for improvement of program performance can be made:

- a) On going monitoring to strengthen the capability of inventory staff in purchasing service and inventory control should be continued at least once a month.
- b) The Internal Audit should be carried on annually in order to monitor the activity of inventory management system, which will enhance the efficiency of the inventory management system.
- c) The qualifications specific for recruiting a person who working in area of inventory management should be a good command of computer. Because of they are useful for the development of inventory management system activity and will be the preparation for accommodating IT System in the future.
